Building Lifelong Learners

Frameworks is an upper elementary program (4th-6th) that builds learning skills, introduces the classroom setting, and provides academic accountability — while maintaining home instruction as the primary source of education. This program is for families who desire teacher-prepared lesson plans and an easy-to-follow weekly assignment schedule for Literature, Writing Instruction, History, and Science. Parents are responsible for educational oversight, and students are required to complete assigned weekly work.

Each grade-level classroom provides an engaging learning environment complete with hands-on science experiments, group project opportunities, and academic accountability. Most of all, Frameworks teachers encourage a love for our Creator, His people, His history, and His story in each student.

We offer:

- Classroom structure
- Weekly assignments planned, graded, and reported by teachers
- Student assessment and accountability
- Active parent-educator involvement

Subjects we cover in the classroom and at home:

Literature | Writing Instruction | Grammar usage | Vocabulary | History | Science

Subjects you add to home studies: Math | Bible | Grammar skills | Spelling

Classroom teachers: Create a safe and encouraging classroom community | Provide exciting classroom learning experiences | Plan assignments, collect work, provide assessment, and post grades in subjects covered

Parents: Benefit from having a teacher partner | Receive a Weekly Assignment Sheet (WAS) that contains three days of assignments to be completed at home and returned to the classroom teacher | Receive weekly classroom updates via email and the eLC (e-Learning Campus) | Have access to an online grade book

Students: Benefit from small class sizes | Enjoy multiple subjects with one classroom teacher | Strengthen presentation skills, study habits, and academic accountability | Use the eLC to enrich their home studies and assignments | Develop peer relationships
